

005: Placing \$ notes in order

Recognising dollar notes and placing them in order according to value

Starting Session

Hand out the different Miniland notes in order to get familiar with them. Learn to recognise them according to their value and look for differences between them. (Open game and/or conversation).

Miniland Product Game

Place the Miniland notes on the drawings on the sheets designed for this activity (printed out beforehand). The sheets enable you to identify and place the notes in order according to their value.

Digital Game

When finished, play the digital game to reinforce content. The game consists of dragging the note the bird has in its beak in the corner to the pile of corresponding notes, according to its value. The counter records the number of notes classified correctly in the time of 60 seconds (1 minute).
