

019: Follow the Path

Exercising left-right directional skills and controlling the first lines

Starting Session

Develop left-right concepts in the classroom. Print out the pre-writing sheets. The activity consists of first painting the vehicle and house in the same colour. Then mark the path the vehicle needs to take to the house using the same colour.

Miniland Product Game

Organise a game session drawing paths on pieces of continuous pieces of paper or on the floor, moving the Miniland vehicles along them. Take the opportunity to develop lines: vertical, horizontal, oblique, curves, etc.

Digital Game

When finished, play the digital game to reinforce content. Colour in the selected vehicle the same colour as the house. Once coloured in, the vehicle is located at the beginning of the path. The game consists of getting the vehicle to the house, moving it over mountains, waves, etc, practising graphomotricity.
