

045: Complete your Abacus

Link geometric figures and colours

Starting Session

Hand out the Abacolor Shapes Miniland game to familiarise with it. Search for differences and likeness between the geometric figures. (Free play and/or conversation.)

Digital Game

The aim of the game is to drag the piece shown on the top of the screen to the pointed place at the bottom of the abacus. There have to be 15 pieces placed on the abacus.

Miniland Product Game

Print one of the two sheets and colour the figures according to the colours we want to work with. Select the proposed pieces and place them in the abacus using the coloured sheet as reference. We work concepts such as up, down, on the side, colour names, geometric figures names...
