

012 Fruit Pair Game

Stimulate the memory locating and identifying fruit

Starting Session

Print out the fruit sheet and follow the instructions for cutting out and preparation. Show the sheet and explain the differences between the fruits: colours, shapes, and the name of each one. Explain the rules for the Pair Game.

Miniland Product Game

Place the vegetable sheet in the Miniland Pair Game and start looking for pairs. In turns, open two pieces from the "memory". When you find a pair you say aloud: "it's a vegetable and it's called... (the name of the fruit)".
