

024 Nuts and Bolts

Associating geometric figures and colours

Starting Session

Hand out the Miniland nuts and bolts game to get familiar with the pieces involved. Look for differences and similarities among the geometric figures: circles, triangles and squares (free game and/or conversation).

Miniland Product Game

Print out the sheet, choose the drawings of the piece, nut and bolt you wish to work on. Paint them the same colour. Once they have been coloured in, look for the nut and bolt in the real Miniland game and screw them together.

Digital Game

When finished, play the digital game to reinforce content. The game consists of pairing the nut and bolt of the same shape and colour. Drag the pieces into the center of the scenario. If they are correct they will screw into the machine.

Educational content

Mathematics

- Logical-mathematical skills.
- Identifying colours.
- Identifying geometric figures: triangles, squares and circles.
- Spatial notions.

Lengua

- Vocabulario.

TIC

Uso del entorno digital.
