

048 Creating funny faces I

Getting to know and identifying the parts of the face

Starting Session

Hand out the Miniland Crazy Faces game and let the children play freely. Talk about how the different faces can help us to express and understand other people's feelings.

Miniland Product Game

Place the pieces (eyes, mouths,...) of the Crazy Faces game on the sheets printed out beforehand to create original faces. You can also place the pieces on your photographs to make funny faces. Comment on what each of the faces created expresses.

Digital Game

When you have finished play the digital game to reinforce the content. The game consists of dragging different parts of the face to create a funny face. With the arrows you can select the model of the face, there are 4 different ones. There is also a menu to select eyes, ears, noses, hair and mouths. Of the last element placed you can modify its size and rotate it by pressing the buttons, located on the left side of the screen. When you are done, press the tick to see the final result. If you want to print it, press the printer icon.
