

053 What do I need?

Know and identify the jobs and related objects

Starting Session

Pass out the Miniland game and talk about the different jobs, accessories and items that are unique to each job. For example, the fireman needs a hose.

Miniland Product Game

Play dominoes with Miniland characters. Print and cut out the tokens and distribute them. Put together the characters related to the 6 jobs and place them in a visible spot. Paste the first token on continuous paper and relate the object to a job. Verbalize the association and point to the character. For instance, What job needs a syringe? What character needs a rocket for his or her job? ...paste tokens in domino fashion. The first player with no tokens left wins.

Digital Game

When you finish, play with the digital game to reinforce contents. The game consists of choosing the 6 items related to the job being shown. For example: Police officer (police dog, badge...). When you guess the chosen item right, it will disappear. If you fail, a red face will pop up and there will be an error sound, and you will have to continue trying.

Educational content

Language

- Vocabulary related to the job-related objects.

Social knowledge

- Knowledge of an interest in the different jobs and tasks those people do.

Mathematical knowledge

- Matching concept.

ICT

Use of the digital environment
